PROFESSIONAL SUMMARY

Java Full-Stack Software Engineer with over 4 years of experience designing, building, and maintaining enterprise web platforms, ERP modules, and REST APIs. Skilled across the full stack with Java 18, Spring Boot, Spring Security (OAuth2), JPA/Hibernate, Angular, and React TS, and experienced delivering production systems for government and enterprise clients. Strong background in agile delivery, CI/CD, and secure backend architecture.

WORK EXPERIENCE

Java Fullstack Developer

Since February 2025

EADN | Algeria

Develop enterprise-level platforms and web portals for multiple government clients, delivering comprehensive ERP solutions with distinct modules for human resources (HR), logistics (movement, storage, and distribution of goods), inventory management, and bill of materials (BOM). These solutions have been implemented for several ministries, including the Ministry of Tourism and Culture, using Java EE, JSF, PrimeFaces, JavaScript, and AJAX.

Fullstack Java Developer

December 2024 – March 2025 (3 months)

Algerian Ministry of Finance | Algiers, Algeria

Developed internal web application solutions using Spring Boot to build a robust, scalable, and secure backend infrastructure. Stack: Java 18, Spring Boot 3, Spring Security (OAuth2), JPA/Hibernate, React TS, PostgreSQL, PL/SQL, Postman, Maven, Docker.

Fullstack Java Developer

February 2024 – November 2024 (9 months)

Teletic | Algiers, Algeria

Developed an e-commerce platform for phone accessories using Spring Boot to build a robust, scalable, and secure backend infrastructure. Stack: Java 18, Spring Boot 3, Spring Security (OAuth2), JPA/Hibernate, React TS, Oracle DB, PL/SQL, Postman, Maven, Docker, Jenkins, ClickUp.

Java Backend Developer

November 2023 – November 2024 (1 year)

Teletic | Algiers, Algeria

Developed and optimized REST APIs for a Topup solution handling 40k transactions/day, and wrote technical documentation. Stack: Java 18, Spring Boot 3, Spring Security (OAuth2), JPA/Hibernate, Angular 15, Oracle DB, PL/SQL, Postman, Maven, Docker, Jenkins.

Freelance Java Desktop Developer

Since January 2021 (4+ years)

Freelance | Tiaret, Algeria

Developed a desktop application for a gym management system using Java Swing and JavaFX, integrated with MySQL and Firebase.

EDUCATION

Master's Degree, Software Engineering

September 2017 – October 2019

Ibn Khaldoun University | Tiaret, Algeria

Simulated an autonomous e-commerce agent using Java JADE to automate buying and selling. Used the DEVS Suite simulator for system modeling and proposed an approach for transforming UML diagrams into DEVS Suite models,

enhancing agent-based system simulations. Developed skills in multi-agent systems, model transformation, and simulation tools.

Bachelor's Degree, Computer Science

September 2014 – October 2017

Ibn Khaldoun University | Tiaret, Algeria

Developed a web platform connecting individuals needing item transfers with vehicle owners offering delivery services. Built the back-end with PHP and MySQL and the front-end using Bootstrap and jQuery for responsive design and dynamic interactions. The platform streamlined communication, delivery tracking, and vehicle management for efficient item transportation.

SKILLS

Frontend: Angular, React TS, HTML, CSS

Backend: Java 18, Spring Boot, Spring Security, Spring Batch, JPA, Hibernate, JUnit5, Mockito, TDD, MySQL, Oracle, PostgreSQL, PL/SQL, Jenkins, Docker, Git, GitLab, GitHub Actions, Keycloak, JSF, JSP, AJAX, JavaScript

Project Management: Jira, ClickUp (Agile), Slack (Collaboration)

LANGUAGES

Arabic: Native speaker
